

Online Shopping Cart

The Shopping Cart for Online Booking Page

Shopping Cart will allow guests to book multiple reservations at different times and pay their total in one payment. Additional Online Products can also be made available for purchase and added to their upcoming reservations via the Shopping Cart.

Contact DigitalRez to enable the Shopping Cart module.

1 Online Booking Page Menu Button

A new button, labelled **Cart**, will now display on the Online Booking Menu Bar after a guest has logged in, or completed their reservation.

When the guest makes their online booking, they have an additional option when they get to the **Comments/Terms & Conditions** panel.

The **Add To Cart** button allows them to add the booking to the Shopping Cart.

Instead of the **Pay** button, the **Accept** button will display to pay for the reservation straight away.

2 Shopping Cart

After the **Add To Cart** button has been pressed, the **Shopping Cart** will display with their reservation details:

- Unit Type
- Check In and Out date
- Reservation Total Amount.

X button is available to remove the reservation(s) from the Shopping Cart.

When reservations are displaying in the Shopping Cart they have not been confirmed until payment has been applied. Availability of all reservations added to the Shopping Cart will only be held for 10mins from the last reservation added to the cart. If a guest attempts to confirm their cart after that time, the availability may no longer be available and the reservations are not successful.

3 Adding Products/Services to a Shopping Cart

If you have **Online Products** setup, they are also available to be added to the Shopping Cart.

When the guest clicks on the **Products/Services** button on the Online Menu Bar, all your products will display for purchase.

The Guests have three options available for payment:

- **Pay Now:** Guest will pay for the Product/Service right then and the product will be a stand alone purchase and not be assigned to a reservation.
- **Transfer to Reservation:** Allows the guest to transfer the product and charge to an upcoming reservation.
- **Transfer to Shopping Cart Reservation:** Allows the guest to transfer the product and charge to a reservation in the Shopping Cart, to pay for when paying for the reservation/shopping cart total.

4 Paying Shopping Cart Charges

When the guest clicks **Pay** on the Shopping Cart, they will be transferred to the Payment Gateway screen to select their credit card type and process through the payment.

Group Bookings on the Shopping Cart

Shopping Cart will allow guests to book multiple reservations at different times and pay their total in one payment.

1 Online Setting tab preferences - Mandatory

With the Shopping Cart enabled, your Online Setting tab preferences still apply.

Multiple reservations can only be added to the Shopping Cart if the **Online Group Bookings** flag is enabled in the **1. Business Setup > Online Settings** tab.

If the **Online Group Bookings** flag has been disabled, the guest will receive a message to indicate that Group Bookings are not available.

Group bookings across different Unit Types are only available if the

2 Online Map Group Bookings

When the Shopping Cart has been enabled, **Group Online Bookings via the Map** can be made.

Guests can select the first site/unit on the Map and add the reservation to the Shopping Cart.

By clicking **New Booking**, the guest will be able to create another reservation to add to the Shopping Cart.

Once the reservations have been paid for, it will become a confirmed Group Booking.

Multiple Reservations can be add for different Unit Types, different Check In dates and also different lengths of stay.
